

# PrimePaper

## The natural print substrate

### Product properties

- Use of FSC®-certified pulps from sustainably managed forests
- Look and feel of a genuine natural product
- High opacity, dimensional stability and good mechanical strength
- Large selection of grammages

### Your benefits

- You have a 'green' component for your flexible packaging that is made from 100% renewable raw materials
- Excellent printability with traditional and new printing processes
- A wide variety of grammages and substrate thicknesses
- For an environment-conscious footprint at the point of sale

SPECIAL PAPER

### PrimePaper white

- Base paper, smooth on one side
- Grammages of 30–100 g/m<sup>2</sup>
- For gravure/flexo printing and HP Indigo systems

### PrimePaper inkjet white

- Base paper, matt
- Grammages of 40–100 g/m<sup>2</sup>
- For inkjet printing

### PrimePaper touch&feel

- Base paper, matt
- Grammage of 40 g/m<sup>2</sup>
- For gravure/flexo printing and HP Indigo systems

# Our packaging solutions

for optimal protection of your products.

## Sustainability

The environment-friendly paper base, made from renewable FSC®-certified pulps, provides a sustainable packaging experience.

## Haptics

The printed paper surface offers you the look and feel of a natural product at the POS.

## Flexo/gravure printing

The surface quality of our flexible paper composites gives you first-class results with the traditional packaging printing processes – flexo and gravure printing.

## Inkjet printing

We are the first paper manufacturer to offer all of our paper composites either with inkjet printability or optimised for HP Indigo digital printing. This allows you to realise very small batches and individualisation.

## Light protection

Using paper as a component in the packaging composite gives your packaging 'green' protection against light that then no longer has to be generated by printing inks.

## Certified paper composites for your packaging

Felix Schoeller paper composites can be labelled with certificates in line with your wishes – individually, in accordance with your requirements and tailored to each specific target group. To ensure this, we work with independent certification institutes.

Pulps from sustainable forestry

Systematic hygiene management

BRC packaging

Climate-neutral packaging

ISEGA-certificates
